Description

Your ability as a program manager to demonstrate best practices in program management both on the job and through professional certification is becoming the standard to compete in today's fast-paced and highly technical workplace. This course describes the basic concepts of program management and offers a job-related approach to successful program management across application areas and industries. This course is designed for experienced program management professionals interested in formal program management training, professionals working toward the Project Management Institute, Inc. (PMI®) Program Management Professional (PgMP) certification, or completing Professional Development Units for PgMP renewal. The Standard for Program Management is the Second Edition (2008 Update) and in preparation for the revised exam content based on RDS (Role Delineation Structure) that comes into effect from January 2012.

Expected Duration

11 Hours 59 Minutes
